

Times of Change

**LIVING IN A TIME
OF SHIFTING CLIMATE**

A series of talks to help us explore the local and global changes that are afoot, and inspire our creativity for meeting the challenges ahead.

April 25, 2017

Native Plants as Food: Integrating human ecology and natural history in a time of shifting climate

Our presentation this evening is "Native Plants as Food: Integrating human ecology and natural history in a time of shifting climate." Abe Lloyd is an ethnobotanist and director of Salal, The Cascadian Food Institute, whose mission is to integrate human communities and native ecosystems through indigenous foods. Native plants thrive in our soils and climate, without supplemental fertilizers and care. In a time of rapid climate change, they provide a local, sustainable, predictable, and resilient source of food. Come learn about the many sources of native, nutritious food.

These presentations are part of Transition Fidalgo & Friends' monthly gathering, the Seventh Generation Supper. All are welcome to enjoy a simple supper (suggested donation \$5, please bring your place setting), at 5:45 p.m., or simply join us for the presentation around 7:00.

Anacortes Senior Activity Center, 1701 22nd St.
