

Times of Change

**LIVING IN A TIME
OF SHIFTING CLIMATE**

A series of talks to help us explore the local and global changes that are afoot, and inspire our creativity for meeting the challenges ahead.

March 27, 2018

You, too, can be a scientist! Citizen science projects in the Salish Sea

Since our beginnings, humans have learned by observation and experimentation. Today, the practice of citizen science is taking off throughout the world, and some of the most successful projects began right here in the Salish Sea. Betsy Carlson, the Citizen Science Coordinator for the Port Townsend Marine Science Center, will share an overview of some of the projects being conducted in Puget Sound today and a perspective on why citizen science is so important in today's economy and climate. Come be inspired and get motivated to join the Citizen Science workshop at FutureFest on April 21-22.

These presentations are part of Transition Fidalgo & Friends' monthly gathering, the Seventh Generation Supper. All are welcome to enjoy a simple supper (suggested donation \$5, please bring your place setting), at 5:45 p.m., or simply join us for the presentation around 7:00.

Live music provided by John Parker.

Anacortes Senior Activity Center, 1701 22nd St.
